PROFILE

Junior Analytics Engineer at Just Eat Takeaway.com, focused on building scalable features and analytics to support customer experience through personalisation and component ranking. I enjoy approaching problems holistically, considering data quality, modelling, and downstream use cases together to design systems that enable reliable analysis and data-driven decisions.

CORE SKILLS

- Google **BigQuery** (SQL)
- Data Analysis & Visualisation (**R, Python**)
- Advanced **MS Excel** (pivot tables, formulas, VBA)
- ETL/ELT Tools (**Talend, Apache Airflow, dbt**)
- **Dashboard** building (Looker Studio, tableau)
- Applied use of AI tools

EDUCATION

University of Bath • MSc Business Analytics • 2022-2023 • Scholarship Holder

Distinction. Modules included: Business Intelligence & Databases, Optimisation & Spreadsheet modelling, Business Statistics & Forecasting, Data Mining & Machine Learning, Heuristics & Simulation and Project Management. Partnered with Mayden to write my dissertation on the application of automatic IT support ticket classification using text mining.

University of Bath • BSc (Hons) Physics with Placement • 2018-2022

1st Class Honours. Developed skills in technical report writing, problem solving and coding (python, C/C++, MATLAB).

RELEVANT EXPERIENCE

Just Eat Takeaway.com • Junior Analytics Engineer • Aug 2025 – Present • Bristol

- Built and maintained scalable, cost-optimised data pipelines for product features, analytics and machine learning pipelines, including high-volume event-driven data.
- Led the migration of Airflow DAGs from SQL-based workflows to a dbt-based architecture, improving maintainability and testing.
- Implemented data quality checks and tests to improve reliability of production and analytics datasets, taking ownership of key pipelines and proactively investigating and resolving warnings and failures.

Mayden • Business Data Analyst • Jan 2023 – Aug 2025 • Bath

- Built and maintained ETL pipelines using Talend studio to prepare MySQL data for analytics and reporting
- Designed and owned internal dashboards in Looker Studio used by product, finance, and operations teams
- Co-owned backlog gardening and roadmap planning, aligning analytics delivery with evolving business priorities
- Delivered projects across product usage analysis, invoicing efficiency, and workforce analytics including implementation of third-party CRM and finance systems

The Walt Disney Company • Retail Insights Intern • Sept 2020 - July 2021 • London

- Responsible for the sourcing, validation, and analysis of sales data to extract detailed context and insights to the wider business, driving strategic planning and commercial decision making.

OTHER EXPERIENCE

University of Bath SU • Bar Team Leader • Sept 2021 – Dec 2022 • Bath

Developed leadership and interpersonal skills through managing a fast-paced student bar through a variety of events, undertaking this additional responsibility alongside my studies.

ACTIVITIES

- Passionate about gender diversity in STEM; committee member of Bath Women in Tech (2022–23) and judge at the 2024 Bath Women in Tech Hackathon
- Completed IBM SkillsBuild courses in Design Thinking and Agile Explorer
