Profile

Analytics Engineer building reliable data pipelines and production features for personalised customer experiences. I combine technical and product thinking to design high-quality data systems and AI-assisted workflows that support analytics, machine learning and downstream applications.

Core Skills

Languages	: SQL, Python, R
Data Engineering	: dbt, Talend, Apache Airflow, ETL/ELT Pipelines
Data Platforms	: Google BigQuery, AWS Athena, Iceberg
Analytics	: Product Analytics, A/B Testing, Data Quality, Data Visualisation
BI Tools	: Looker Studio, Tableau, Advanced Excel
Dev Tools	: Git, Visual Studio Code, CI/CD, AI-Assisted Workflows

Experience

Associate Analytics Engineer

Just Eat Takeaway.com

Aug 2025 – Present

Bristol, United Kingdom

- Build **SQL and dbt pipelines** supporting personalised recommendations, product analytics, feature attribution, model training and ML inference.
- Collaborate with **software engineering, data science and ML engineering** teams to deliver customer-facing and analytical data solutions.
- Support **A/B testing** and improve data reliability through monitoring, alerting and CI checks.
- Translate complex requirements into robust technical solutions and develop **AI-assisted workflows** to improve engineering efficiency.

Business Data Analyst

Mayden

Jan 2023 – Aug 2025

Bath, United Kingdom

- Built a financial reporting suite using **Talend ETL pipelines** to integrate product analytics, prepayment and invoice data, automate invoicable amount calculations and reduce month-end P&L reporting from **several days to a single morning**.
- Built **Looker Studio dashboards** and insight-ready data sources, enabling Account Management and Customer Support teams to monitor customer satisfaction and response-time SLAs.
- Co-owned product backlog and Scrum activities, led **data literacy initiatives**, and supported the selection and implementation of CRM, finance and HR systems against complex business and data requirements.

Retail Insights Intern

The Walt Disney Company

Sept 2020 – July 2021

London, United Kingdom

- Responsible for sourcing, validating and analysing sales data to extract **actionable insights** for the wider business, driving strategic planning and commercial decision-making.

Education

MSc Business Analytics

University of Bath

2022 – 2023

Scholarship Holder

- Graduated with **Distinction**. Modules included: Business Intelligence & Databases, Optimisation & Spreadsheet Modelling, Business Statistics & Forecasting, Data Mining & Machine Learning, Heuristics & Simulation, and Project Management
- Partnered with **Mayden** to write my dissertation on the application of automatic IT support ticket classification using **text mining**. Achieved highest grade of my cohort (81%).
- Committee member of **Bath Women in Tech** (2022–23) and judge at the 2024 Bath WIT Hackathon

BSc (Hons) Physics with Placement

University of Bath

2018 – 2022

- **1st Class Honours**. Developed skills in technical report writing, problem solving and coding (**Python, C/C++, MATLAB**)
